

## One day training program on crop management and seed production organized under SCSP at ICAR-CAZRI, RRS, Jaisalmer

The one-day training program on “crop management and seed production” has been organized at CAZRI-RRS, Jaisalmer on 24<sup>th</sup> of September, 2021 under SCSP program. A total of forty farmers from village Kotri have been participated in this training. Dr. M. Patidar, Head, RRS, Jaisalmer welcomed the participant and highlighted the importance of seed production for enhancing crop productivity and income of the farmers. Dr. Anil Patidar explained the importance of improved varieties and their cultivation practices for higher seed production. The scientist from CAZRI, Jodhpur, Dr. R. K. Kakani and Dr. Archana Sanyal delivered lectures on seed production principles, seed processing, storage and marketing. Dr. Kakani also explained the improved cultivation practices and seed production of cumin. Dr. Saranya R. briefed about seed treatment techniques. The KVK scientists of Jaisalmer, Dr. Charu Sharma and Dr. Rajveer Chowdhory also delivered lectures on seed packaging, grading and mechanization in agriculture. Dr. Dileep Kumar has coordinated the training program. Other technical staffs of CAZRI-RRS Roshan Lal Meena and Sumit Kumar were helped in registration of the farmers. Farmers also visited the experimental field and crop cafeteria. They were very happy to see different varieties of Guar, Moong, Moth, Bajra and Mateera. They appreciated the crop performance and assured to adopt improved varieties of different crops in their fields.
